

TRIOSIGN

BRILLIANT

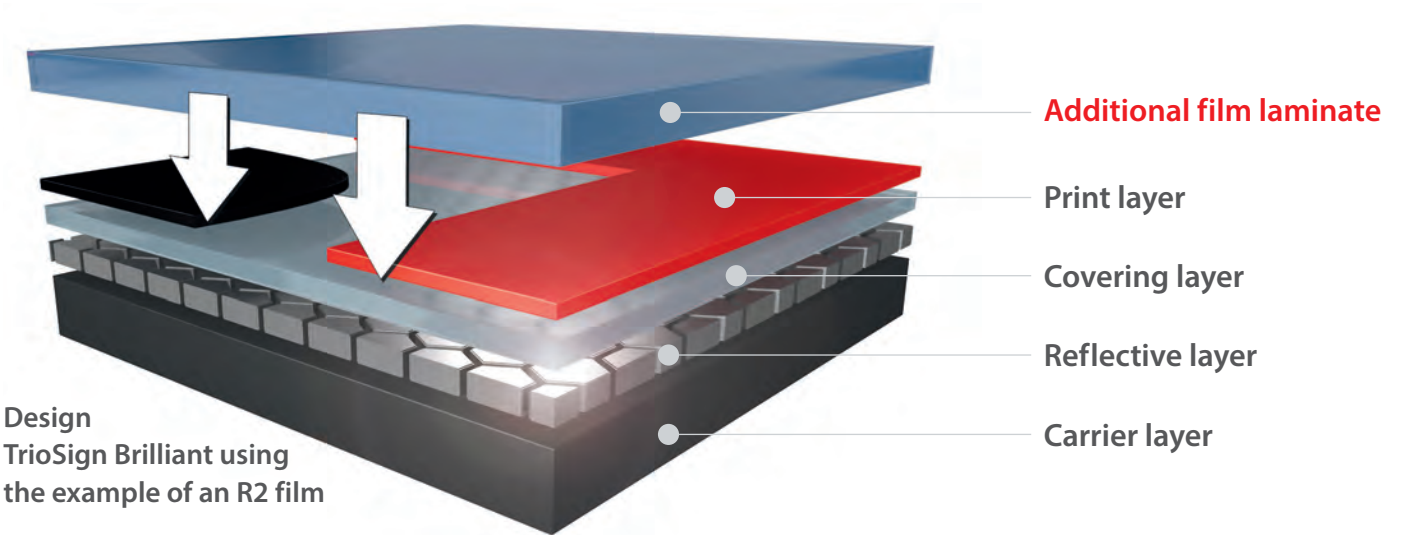

THE PREMIUM FOLDING SIGN WITH
ADDITIONAL FILM LAMINATE

ADVANTAGES FROM ALL SIDES

Space-saving storage and ready to use in no time at all – folding signs are ideal for quick, high-visibility warnings about hazards. TrioSign Brilliant, Nissen’s premium folding sign, is a solution that offers numerous advantages in addition to higher visibility.

The Nissen premium folding sign TrioSign Brilliant stands out mainly due to its advanced film technology. Using a special process, we print the familiar R1 or R2 films with the individual symbols and texts and then coat the sign with an additional film laminate.

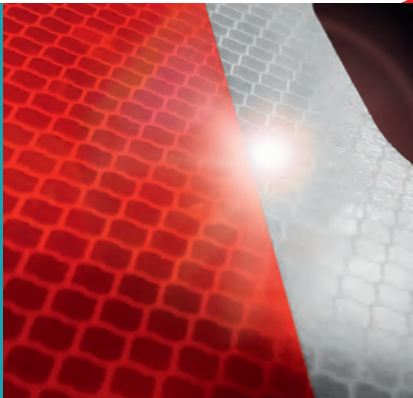

The advantage:

The TrioSign Brilliant folding signs have higher reflection values, increased colour brilliance and all-around improved durability. In addition, this generation has all the benefits of the previous model: well-designed and robust construction, custom design options and helpful accessories. Choose the premium folding sign Nissen TrioSign Brilliant and take advantage of the perfect solution for everyday use.

Your advantages of the R1 and R2 variants

- Higher reflection values also in the printed areas
- Noticeably better colour brilliance
- Protection against abrasion, acid and UV rays
- Longer durability
- Lotus effect prevents dirt build-up

UNLIMITED, CUSTOM VARIETY

1 All sizes

Nissen TrioSign is available in four internationally recognised standard sizes. 60, 70, 90, and 110 cm (side length).

2 All sides

Each side of your TrioSign folding sign can be designed individually. Make your selection from the signs of different country catalogues. You can also select individual signs and multi-colour printing.

COM-MADE

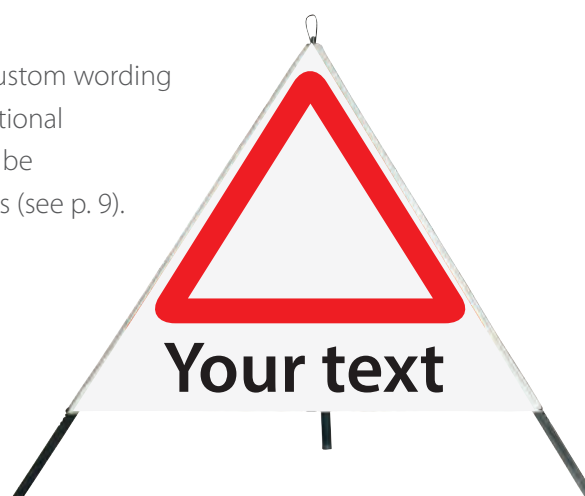

For street traffic or on site, our folding signs suit almost every application and are custom manufactured to meet your requirements. TrioSign folding signs designed by Nissen are manufactured in a custom-made fashion to meet your requirements. Choose between different sizes, films, and signs from the various country catalogues.

3 All languages

Personalise your TrioSign with standardised text or custom wording tailored to your needs. For even greater flexibility, optional interchangeable Velcro text strips allow messages to be updated quickly, expanding the range of applications (see p. 9).

Sample texts:

4 Films

TrioSign folding signs are available with white or yellow film and in three different reflection classes, respectively: non-reflective (R0), highly reflective (R1) and very highly reflective (R2). The R1 and R2 film is waterproof, weatherproof and uv-resistant.

A SIGN OF QUALITY

All design elements of our TrioSign folding signs originate from our in-house production department. Benefit from certified quality.

From the stable stands made of galvanised profile steel, to the covering made of resistant PVC plastic fibre, to the individual accessories, we produce and install most of the components of the TrioSign folding signs ourselves. The additional film laminate on the Brilliant R1 and R2 folding signs is also applied and reliably bonded using a process we developed.

Easy setup

Well-thought-out mechanics: One short movement of the wrist and the TrioSign folding signs are ready for deployment.

Highest stability

A clear edge: The support legs of the TrioSign folding signs are neither rounded off nor chamfered and, just like spikes, provide for secure positioning.

Robust design

High resilience: Nissen TrioSign folding signs are fully manufactured from steel. Advantage: weather resistance through lamination of the R1 and R2 variants.

Quick replacement

More flexibility: Thanks to convenient quick-releases, the coverings of the TrioSign folding signs can be replaced in no time.

Easy handling

Securely positioned: A robust spring mechanism prevents the TrioSign folding signs from collapsing unintentionally.

High compatibility

Without an adapter: The warning lamps Star-Flash (all models) and City Flash can be fitted without any additional support.

THE IDEAL SUPPLIER FOR EVERY APPLICATION

EMENT CATION

The high level of customization for your Nissen TrioSign folding sign is reflected by the abundant range of accessories:

Central weights providing for a higher stability

1,500 g for TrioSign 60 and 70 cm

1,800 g for TrioSign 90 cm

2,500 g for TrioSign 110 cm

Velcro strips for a greater variety

Velcro strips for TrioSign with a stitched-on Velcro tape

GIVE US A SIGN
